PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with strong foundations in SQL, Python, JavaScript, React, database management, and software engineering. Currently pursuing a Bachelor of Science degree in Network and Systems Administration while completing an intensive Software Engineering certification program with specialization in Artificial Intelligence and Data Science. Experienced in developing full-stack web applications, managing structured data, and applying modern development practices using Git and GitHub. Passionate about building reliable, data-driven solutions and eager to contribute to innovative software projects in a collaborative environment.

TECHNICAL SKILLS

Programming Languages

- SQL
- Python
- JavaScript
- HTML5
- CSS3

Database Technologies

- MySQL
- PostgreSQL
- SQLite
- Database Design
- Data Modeling
- Query Optimization
- SQL Joins, Views, Subqueries, and Aggregations

Data & Analytics

- Pandas
- Data Cleaning and Transformation
- Data Analysis

- Data Visualization
- ETL Concepts

Front-End Development

- React.js
- Tailwind CSS
- Responsive Web Design
- Component-Based Architecture

Tools & Technologies

- Git
- GitHub
- REST APIs
- VS Code
- Docker (Foundational Knowledge)
- Power BI (Foundational Knowledge)

Software Development Practices

- Agile Methodologies
 - Version Control
 - Debugging and Troubleshooting
 - Software Documentation
 - Problem Solving
-

PROJECTS

Full Stack Hospital Management System

Technologies: React, JavaScript, SQL, REST APIs

- Designed and developed a full-stack hospital management application for managing patient records, appointments, and administrative workflows.
- Designed relational database structures and wrote SQL queries to store, retrieve, and manage patient and operational data.
- Developed responsive user interfaces to improve usability and accessibility.
- Applied CRUD operations and structured database management principles.

Task Manager Application

Technologies: React, JavaScript, Chart.js

- Developed a task management application featuring task creation, editing, deletion, and completion tracking.
- Implemented task status categorization including Pending, In Progress, and Completed states.
- Built interactive dashboard visualizations to monitor task performance and progress.
- Applied component-based architecture and state management principles.

Sales Website

Technologies: HTML, Tailwind CSS, JavaScript

- Developed a responsive e-commerce-style website showcasing multiple product categories.
- Designed reusable UI components and optimized user experience across devices.

Data Analysis Projects

Technologies: Python, Pandas, SQL

- Performed data cleaning, transformation, and exploratory data analysis on structured datasets.
- Developed SQL queries for data extraction, aggregation, and reporting.
- Generated business insights through data visualization and statistical analysis techniques.

Finance – Chatbot Project

Technologies: Python, Artificial Intelligence, Natural Language Processing, APIs

- Developed an AI-powered finance chatbot capable of answering financial queries and providing basic financial insights.
- Integrated natural language processing techniques to improve user interaction and response accuracy.
- Implemented API integrations for retrieving and processing financial information.
- Designed conversational workflows to enhance user experience and engagement.
- Applied Python programming and AI concepts to build intelligent, data-driven chatbot functionality.

EDUCATION

Bachelor of Science (BSc) in Network and Systems Administration (Pursuing)

Ghana Communication Technology University - Expected Completion: October 2029

Professional Certificate in Software Engineering

Codetrain Africa

- Two-Year Intensive Software Engineering Program
 - Specialization Areas:
 - Full Stack Development
 - Artificial Intelligence
 - Data Science
 - Python Programming
 - Expected Graduation: November 2026
-
